

### COURSE OVERVIEW:

This course provides instrument technicians and engineers with an in-depth, hands-on training on the Yokogawa ROTAMASS Total Insight (TI) Coriolis Mass and Density Flow Meter and the ADMAG AXG Magnetic Flow Meter. The session will begin with an introduction to the technologies and will then progress into an extensive hands-on review of the meters. The class is conducted at THE UNIT, TechStar's fully functional verification unit where individuals will transfer their knowledge into hands-on scenarios utilizing our state-of-the-art live training unit. This is a one-day course.

### TOPICS COVERED:

- Principles of Operation
- Installation
- Programming using Display, HART & FieldMate Lite
- Meter Diagnostics
- Verification
- On-Board Memory Card
- Utilization
- Troubleshooting
- Multiple Choice Test & Review of Test

### TECHNOLOGIES COVERED:

- Yokogawa ROTAMASS Total Insight (TI) Coriolis Flow Meter
- ADMAG AXG Magnetic Flow Meter
