

Fluenta announces new partnership with TechStar

- TechStar appointed Fluenta representatives across Texas, New Mexico, Arkansas, Oklahoma, and Kansas

[Fluenta](#), a global leader in ultrasonic measurement and management technology for the oil and gas and chemical processing industries, today announces its partnership with [TechStar](#). With more than 30 years' experience in the oil and gas industry, TechStar will represent Fluenta's gas measurement technology in the key territories of Texas, New Mexico, Arkansas, Oklahoma, and Kansas.

Recent EPA regulation has further tightened US requirements on the measurement and reporting of flare gas emissions. It is now more important than ever for companies to have reliable meters to produce precise data. The Fluenta FGM160 flare gas meter allows for highly accurate measurement of a wide range of flare parameters and will help operators comply with national and international regulations.

Arnold Rivas-Griswold, Vice President Americas at Fluenta, commented, "there's no more important market in the Americas than Texas, so having the right representation in this territory is crucial for our success. In TechStar, we have found a partner who understands our market and our customers and can offer exceptional service across a wide geographical area. We're certain that this relationship will be successful and long lasting".

Kyle Kuhlow, President of TechStar, added, "Fluenta offers us a great product and is a fantastic fit for the TechStar portfolio. Our teams have a solid understanding of both flow measurement and the flare gas space. We already have active enquiries from our loyal customer base and are certain we can offer significant added value to Fluenta's presence in the Americas.

About Fluenta

Founded in 1985 Fluenta is the global leader in flow sensing, measurement and management using ultrasonic technology. The company serves the chemicals, petrochemicals and oil & gas markets. Fluenta originates from Norway and has offices around the world, with a regional office for the Americas in Houston, Texas.

About TechStar

Since 2001, TechStar has been the one-stop-shop for quality instrumentation and analytical devices, training and application solutions. With a major focus on customer training, TechStar offer both theoretic and hands-on courses tailored to meet the specific needs of each customer.
