

Join us for the next Level Solutions Snapshot in your area! Spend the afternoon with our technical experts and learn about the latest in level measurement technologies. Become familiar with the physics, startup, operation, calibration and troubleshooting techniques needed to gain an overall understanding of the interaction between the process and the level measurement device. Each session is approximately three hours in length and lunch will be provided.

AGENDA:

- Theory of Operation
- Different Types of Through-Air and Guided Wave Radar Technologies
- Setting up a Radar Correctly
- Installation Best Practices
- Application Specific Discussion
