

J Flow Controls and TechStar Joining Forces for Valves and Valve Automation Solutions

Houston, TX – April 1, 2021: TechStar is combining forces with J Flow Controls to become partners for Valves and Valve Automation Solutions.

J Flow Controls is a leader in process automation and offers an extensive lineup of flow control products and services including:

- Ball valves - 1, 2, 3 piece; multi-port, sanitary, double block & bleed, flanged, metal seated, top entry & trunnion
- Butterfly valves - resilient, high performance, triple offset, AWWA, and cryogenic
- Control valves - AWWA eccentric plug, rotary and segmented valves
- Full range of automation capabilities

Many products meet standards such as AWWA, Fire Safe API 607, NSF, TAA, TA-LUFT Emissions, and UL.

Matched with TechStar's vast offering of technical knowledge, service and training capabilities, and the two companies look forward to offering customers an exciting new competitive valve option.

About J Flow Controls

J Flow Controls is headquartered in Cincinnati, Ohio with an extensive representative network throughout the U.S. and abroad.

The J Flow Controls management team has over 20 years of experience in offering customized project packages in all ranges of the industrial PVF market. Our customers include firms within a wide range of industries including: Oil & Gas, Chemical, Power Generation, Semiconductor, Biofuel/Ethanol, Water & Wastewater, Food & Beverage, Marine, Pharmaceutical, Heating, Ventilating & Air Conditioning

J Flow Controls offers unique pattern designs with fully traceable raw materials, spectroscopic testing of castings, and numerically controlled machining. All valve components are inspected to international standards after assembly. The valves are fully tested to API 598. The manufacturing process is committed to the ultimate in close tolerance production allowing us to guarantee high quality, high cycle, and flexibility in materials to meet our customer's demands.

The strength of our technically trained sales, engineering, and service teams; the quality of our products; and our innovative solutions distinguishes J Flow Controls in the marketplace and makes us the right choice to meet your objectives. We look forward to the opportunity to serve you.

About TechStar

Since 2001, TechStar has been the one-stop shop for quality instrumentation and analytical devices, training, and application solutions. They are a leading manufacturer representative in the oil and gas, energy,

water/wastewater, food and beverage, and pharmaceutical industries. TechStar offers instrumentation and analytical solutions that encompass the entire lifecycle of products and services.

TechStar has an established reputation in the Southern West, Midwest, and Gulf Coast regions of the US and is rapidly expanding its footprint with new partnerships in surrounding states. With deep roots in every community they serve, TechStar's culture focuses on building meaningful relationships between their partners and customers.
