

AGENDA

LEVEL MEASUREMENT USING GUIDED WAVE TECHNOLOGY TRAINING

COURSE OBJECTIVE:

This one day class is for operators and technicians who have responsibility for Guided Microwave gauges. Individuals will become familiar with the physics, startup, operation, calibration and troubleshooting techniques needed to gain an overall understanding of the interaction between the process and the measurement device.

****ALL TRAINEES MUST HAVE LAPTOP COMPUTER****

AGENDA:

- Basic Theory of Operation for Guided Microwave (TDR) Gauges
- Summary of Radar Models
- Best Practices for Installation
- Overview of Software
- LAB Scenarios – Hands-On
- Troubleshooting
- Multiple Choice Test & Review of Test
